

iii. *Outcomes Research*

1. Assessment of Quality of Life in End Stage Renal Disease Patients on Haemodialysis
2. Assessment of Quality of Life in Asthma Patients Receiving Different Inhaled Steroids
3. Assessment of Pattern and Outcomes of Poisoning Cases in a Tertiary Care Hospital
4. Clinician-patient relations as barriers or enablers to uptake of interventions
5. Assessment of Impact of Clinical Pharmacist - initiated changes in Pharmacotherapy in patients with autoimmune disorders
6. Evaluation of Pharmacist-Psychiatrist Collaborative Medication Therapy Management Services
7. Assessment of pharmacist-initiated optimization of pharmacotherapy in patients with acute coronary syndrome
8. Assessment of clinical, economic and humanistic outcomes in breast, head & neck and lung cancers
9. Initiation and evaluation of home medicines review services
10. Evaluation of treatment outcomes and their predictors of opportunistic infections among sero-positive patients
11. Estimation of non-irritating concentration of selected antibiotics for in – vivo diagnosis of drug allergy
12. Assessment of impact of pharmacist provided medication management services in rurally residing elderly patients
13. Assessment and management of adult obesity in primary care setting
14. Assessment of Knowledge, Attitude and practice (KAP) and health related quality of life (HRQoL) in patients with chronic diseases
15. Assessment of impact of structured pharmaceutical care in patients undergoing Haemodialysis.
16. Assessment of knowledge, attitude and practice on drug allergy among inpatients at tertiary care hospital.
17. Assessment of impact of different counselling methods on inhalers amongst asthma and COPD patients.
18. A study on assessment of self-medication among adult population in Mysuru city.
19. Assessment of Pharmacist- initiated intervention on drug therapy management in community setting
20. A study on evaluation of prescription pattern of drugs used in the treatment of peptic ulcer in a tertiary care teaching hospital.
21. Assessment of medication errors among patients visiting community pharmacies.
22. A study on utilization evaluation of Tetanus Toxoid vaccine in surgery department of a tertiary care hospital

23. Assessment of prescribing pattern in gastroenteritis in a paediatric department.
24. Development, Validation and Implementation of a Knowledge, Attitude and Practice (KAP) Questionnaire on Use of Medications among Pregnant Women.
25. A study on opportunistic infections in HIV seropositive patients.
26. Assessment of usage pattern of antibiotics in hospitalized patients of a tertiary care hospital.
27. Assessment of diabetes control and perception of disease among Type 2 diabetic patients
28. Comparison of health outcomes in diabetic and non-diabetic patients on maintenance haemodialysis.
29. Assessment of impact of knowledge, attitude & practice on patient medication compliance in asthma patients.
30. Development and validation of medication adherence questionnaire in local language for chronic respiratory diseases.
31. Assessment of usage pattern of over-the-counter medications among patients suffering from chronic disorders
32. Impact of clinical pharmacist- initiated medication information service on physical and social outcomes of neuropsychiatric diseases.
