

CLEAN WATER AND SANITATION (SDG 6)

The college provides the water dispenser which are placed at various points of the college and hostel for convenience of students to consume safe and clean water.

The campus has planted with sapplings around for pollution free campus and to protect from landscape. The College has RO water facility in the academic and residential areas along with in the premises of hostels is available. The regular water testing is performed in Department of Pharmaceutical Biotechnology of our college and the report is generated and based on that the necessary action is taken if the samples are found contaminated. The campus also provides RO water facilities for staff and students.
