Competency Based Medical Education

Competency Based Undergraduate Curriculum will be implemented from August 2019, i.e. MBBS batch admitted in first year. Batches admitted and studying currently in MBBS shall continue with existing Curriculum.

It intends to take the learner to provide health care to the evolving needs of the nation and the world. The thrust in the new regulations is continuation and evolution of thought in medical education making it more learner-centric, patient-centric, gender sensitive, outcome-oriented and environment appropriate. The result is an outcome driven curriculum which conforms to global trends. Emphasis is made on alignment and integration of subjects both horizontally and vertically while respecting the strengths and necessity of subject-based instruction and assessment. This has necessitated a deviation from using “broad competencies”; instead, the reports have written end of phase subject (sub) competencies.

JSSU ONLINE PORTAL FOR STAFF, STUDENTS AND PARENTS

JSSU Online Framework is envisaged to continuously evolve under a strategic operating model fulfilling many aspects of our University requirements in its quest to achieve excellence. It is expected that this portal enables the streamlining both academic and administrative processes of the University.

The JSSU online portal has a login for staff, students and parents.

The portal can be accessed at www.jssuonline.com. Please select the login type and enter your username and password. The username and password will be sent to you on your mail ID. Kindly contact the IT department for any queries.

For students:

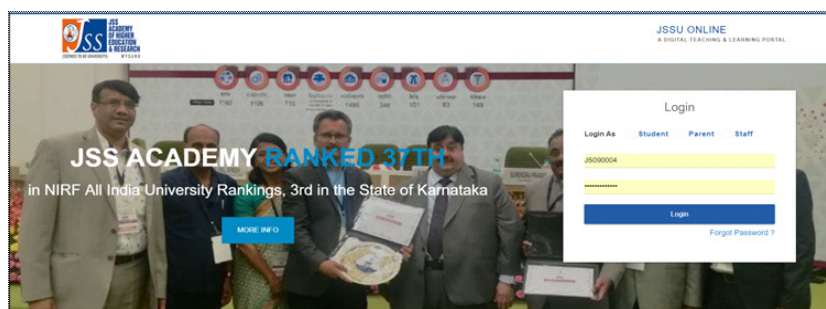

- Students would be able to view their attendance, internal Assessment marks and important communications from the college and University.
- It will also serve as a one site portal for all your educational needs as online teaching learning resources will be provided.
- The portal also will be utilized for online student formative assessment.
- The students and parents will be paired to the respective mentor who will monitor the progress of your ward at JSS University.

For Parents:

- Can access the attendance, internal assessment and progress of their ward regularly.
- Can communicate with mentors to work towards progress of their children.

With this we hope to bring a tremendous change in the student experience at the University and look for the way forward with your support in this direction.

Wish you a happy browsing experience through JSSUONLINE

NAAC & IQAC

The National Assessment and Accreditation Council (NAAC) was established in 1994 as an autonomous institution of the University Grants Commission (UGC) with its Head Quarter in Bengaluru. The mandate of NAAC as reflected in its vision statement is in making quality assurance an integral part of the functioning of Higher Education Institutions (HEIs).

The JSS Academy of Higher Education & Research was accredited with 'A' Grade with a CGPA of 3.34 in its first cycle of accreditation by NAAC in July 2013 for a period of 5 years. The JSS AHER has been reaccredited by NAAC with 'A+' Grade with a CGPA of 3.47 in the year 2018 for a period of 5 years and has been categorized as a "Category I" institution by the UGC.

The Internal Quality Assurance Cell (IQAC) is a post-accreditation quality sustenance measure. The prime task of the IQAC is to develop a system for conscious, consistent and catalytic improvement in the overall performance of our institution. It will channelize all efforts and measures of the institution towards promoting its holistic academic excellence.

The work of the IQAC is the first step towards internalization and institutionalization of quality enhancement initiatives. Its success depends upon the sense of belongingness and participation it can inculcate in all the constituents of the institution. It will be a facilitative and participative voluntary system/unit/organ of the institution.

Objectives:

- To develop a system for conscious, consistent and catalytic action to improve the academic and administrative performance of the institution.
- To promote measures for institutional functioning towards quality enhancement through internalization of quality culture and institutionalization of best practices.

Core Values

JSS Academy of Higher Education and Research will continue to be guided by the legacy and sustaining principles of Sri Suttur Math and the JSS Mahavidyapeetha through:

Ethical Standards- Meeting the highest ethical standards of professionalism to achieve excellence in academic and research activities supporting health and environment, thus benefiting society.

Mutual Respect - Affirming and protecting the rights, dignity and integrity of each member of diverse community by embracing the social, ecological and economic impact.

Student Centric - Fostering a student-centric environment and providing student centred, interdisciplinary, multidisciplinary, collaborative, innovative program leading to professional excellence.

Responsiveness - Serving the needs of the society and 'Touching the lives of millions' through community care and outreach programs.

MENTORSHIP PROGRAM AT JSS MEDICAL COLLEGE

The Mentorship program was started in JSS Medical College with aim of developing a better learning environment and to assist the mentee to take better control of his/her career. The focus of the mentoring program is on the personal and professional needs of the students. Mentoring will aid them to cope with the transition. It also helps them to combat the stress, face them constructively, develop confidence and strive exclusively on achieving the set tasks.

Horizontal mentorship program is followed at JSS Medical College for 1st MBBS and Vertical for rest of batches. The students are allotted the mentors from their respective year faculty. Students need to meet the mentors once in a week and express their grievances if any. Parents need to be contact mentors regularly at least once a month to know the progress of their ward. Both teacher and parents have equal responsibility towards the progress of the students.

Instructions to the:

EXTGRA CURICULAR ACTIVITIES

Biblichor-Literary Club

The word 'Biblichor' represents "The pleasing smell of old books", and we believe nothing holds par to this sensation. This club is an initiative by the students of JSS Medical College to ensure that the works of many closet writers and musers is brought out to the world and also to encourage many beginners to achieve the finesse that they require and seek. This is a haven for them to test their works and gain reviews from colleagues and followers akin.

Various activities will be organized over time:

1. JAM
2. Debates
3. Quizes- Literary and pop culture
4. Literary marathons
5. On the spot poetry
6. Ted talks
7. Author meetups
8. Annual magazine of the best submissions etc.

Additionally, Biblichor also hosts an exclusive blog-
www.voicesinthewhitecoat.wordpress.com.

MUSIC MEDICINE MASTI (MMM)

Purpose: To highlight the events conducted by the Music Club of JSS Medical College. The music club is aimed to incorporate music in the lives of Medical students. To increase social interactions and extra-curricular activities among students. It also aims to increase the college's representation in inter college cultural events and to keep a track of all music related events in the college. The working committee for the club includes a minimum of 2 representatives from each batch and other volunteers willing to help. "The Music Club consists of a total of 104 members". The club has its very own Instagram page (@music.medicine.masti), Facebook page and a Youtube channel.

MYRIAD – THE DRAMA CLUB

Myriad is the brainchild of drama enthusiasts whose ideas were brimming behind the medical books with the sole intention of bringing all this talent onto the stage and out to the world. It is a platform for people with different cultural and linguistic backgrounds to come together to showcase their thoughts, beliefs and emotions through the art of expression.

COMPETENCY BASED MEDICAL EDUCATION (CBME)

Competency is defined as “the ability to do something successfully and efficiently,” and CBME is an approach to ensure that the graduates develop the competencies required to fulfill the patients’ needs in the society. It de-emphasizes time-based training and promises greater accountability, flexibility, and learner-centeredness. The teaching–learning and assessment would focus on the development of competencies and would continue till the desired competency is achieved. The revised curriculum has attempted to enunciate the competencies the student must be imparted and should have learnt, with clearly defined teaching–learning strategies and effective methods of assessment. Communicating effectively and sympathetically with patients and their relatives has been visualized as a core area of the revised curriculum. These and other goals identified in the curriculum are to be implemented in all medical colleges under the ambit of Medical Council of India from August 2019. In a competency-based educational program, you don’t just acquire knowledge and then spit it back at the time of a final exam. Instead, the method of assessment is formative rather than summative, and you are evaluated on how you apply your knowledge to clinical situations that physicians often face. While summative exams, such as certification exams, play an important role in gauging levels of acquired knowledge, formative assessments are equally important.

Key components of Graduate Medical Education Regulations, 2019

- ◆ Roles that define the Indian Medical Graduate
- ◆ Definition of Global competencies for each role envisaged
- ◆ Defined subject-based outcomes that can be mapped to the global competencies
- ◆ Alignment of instruction with reasonable integration
- ◆ Greater emphasis on learner centric instruction
- ◆ Greater emphasis on learning in primary and secondary care environments
- ◆ Student Doctor Method of Clinical Training
- ◆ Emphasis on skill acquisition and certification: A mandatory & desirable comprehensive list of skills has been planned and would be recommended for the Indian Medical Graduate.
- ◆ Early Clinical Exposure: The clinical training would start in the first year focusing on

(a) **Basic science correlation:** i.e. apply and correlate principles of basic sciences as they relate to the care of the patient.

(b) **Clinical skills:** to include basic skills in interviewing patients, doctor-patient communication, ethics and professionalism, critical thinking and analysis and self-learning.

(c) **Humanities:** Merged with AETCOM

- ◆ Longitudinal program on attitude ethics and communication: Attitude Ethics and Communication is a longitudinal modular program that provides for instruction in professionalism, bioethics and communication skills. Dedicated time has been carved out for AETCOM instruction in all the phases.
- ◆ Foundation course: This is a one month to orient medical learners to MBBS program and provide them with requisite knowledge, communication (including electronic), technical and language skills.
- ◆ Shared responsibility and self directed learning
- ◆ Electives: The aim of adding electives is to allow flexible learning options in the curriculum and may offer a variety of options including clinical electives, laboratory postings or community exposure in areas that students are not normally exposed as a part of regular curriculum
- ◆ Time for sport and extracurricular activities
- ◆ Assessment changes
- ◆ Statement of achievement of defined measurable outcomes have been spelt out for each role - these are called global competencies and are summarized in GMR, 2019 document
